SUMMARY

Frontend Developer focused on building modern, responsive, and visually engaging websites using HTML5, CSS3, JavaScript, and Tailwind CSS.

I specialize in transforming designs and ideas into clean, responsive interfaces that work smoothly across desktop, tablet, and mobile devices. I have experience building landing pages, business websites, product/catalogue interfaces, educational platforms, and interactive web sections.

I pay close attention to responsive layouts, typography, spacing, visual hierarchy, animations, usability, and clean frontend implementation.

Currently expanding my frontend development capabilities with modern JavaScript frameworks and tools, with a long-term focus on building high-quality web applications.

EDUCATION

Ladoke Akintola University of Technology (LAUTECH)

B.Tech (Hons.) Physiology — Second Class Upper (2:1)

2025

Rufus Giwa Polytechnic, Owo

National Diploma (ND), Science Laboratory Technology

2019

PROJECTS

UI Development

Git

GitHub

VS Code

Vercel

Netlify

Browser Developer Tools

React

Modern JavaScript

Component-Based UI Development

PROFESSIONAL STRENGTHS

Strong attention to visual details Responsive-first development approach Clean and organized frontend code Ability to translate designs into functional interfaces Problem-solving mindset Willingness to learn new technologies Clear communication Attention to project requirements Focus on delivering polished user interfaces

WORKING APPROACH

Understand → Plan → Build → Test → Refine → Deliver

I take time to understand the client's requirements before implementation, build the interface with responsiveness in mind, test across different screen sizes, and refine the final result to ensure the website is polished and functional.

AVAILABILITY

Available for remote freelance and contract frontend development projects.

Open to: - Short-term projects - Long-term collaborations - Website development - Landing pages - Website redesigns - UI implementation - Frontend maintenance - Responsive optimization
